DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 3 and 4 recite "exhibiting activity at experimental pH and experimental temperature". It is unclear what the metes and bounds of the patent protection sought. It appears that the inventive values are shown on page 4, line 15 (and claims 6 and 7).

Furthermore, lines 7, 9 and 13 recite the recitation "by known method". It is unclear what the metes and bounds of the patent protection sought. It is requested that the known method be provided in the claim language to remove any uncertainty.

Additionally, it appears that the water added and the weight of the soaked hides are critical to the applicant's invention. The novel process is based upon the process recited in steps i-iv of claim 1 in combination with the amount of water added and the weight of the hides. It appears that these values should be incorporated into claim 1 based upon the detailed description provided on page 4, lines 10-25.

Art Unit: 3765

With regard to claims 14-19, the claims recite various comparisons. It is requested that the comparisons be deleted (e.g., delete "as compared to....process" in claims 14-18).

Claims 2-13 and 20 depend from one or more of the above rejected claims and are therefore rejected accordingly under 35 U.S.C. 112, second paragraph.

Allowable Subject Matter

3. Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

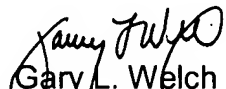

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rodriquez et al. '938, Monsheimer et al. '926 and '087, Pfeiderer et al. '924, Christner et al. '428, Andersen '299, Leuck '302, Geihlsler et al. '027 and Thanikaivelan et al. '531 disclose various dehairing processes.
